Do you:

• Have a child between **5 and 10 years old**, diagnosed with an **Autism Spectrum Disorder (ASD)**?
• Want to help researchers understand the emotional development of children with ASD and how their parents manage stress?
• Want to better understand your child’s physical stress responses?

Participation includes a parent-child research visit, psychophysiological measurement of emotion, child assessment, and parent questionnaires. Families are compensated $30 for their time, and receive a summary of findings relating to their children’s physical stress responses and autism symptoms.
