Monday – Friday 7 am – 6 pm

Agency Description
(Village of Hope - Orange County Rescue Mission) is a full service live-in 2 year residential discipleship program. Homelessness is the number one criteria for admission. It is a Christian-faith based working program, where “students” (residents) are assigned a case manager and are given a work assignment during their first nine months of residency such as clerical, housekeeping, maintenance, landscaping, child development center or kitchen. Many of the “students” have struggled with substance misuse and abuse, subjected to domestic violence, discrimination, marginalization, homelessness. As a result many of our students experience panic, anxiety, depression, relapse issues, etc. We also have House of Hope, Hope Family Housing and Strong Beginnings. These other programs allow much more freedom and independence for the students as they are all working in paid jobs throughout the County.

Hurtt Family Health Clinic on the site of the Village of Hope is a FQHC, federally qualified health center. Hurtt Clinic sees patients for a variety of problems and concerns, usually chronic medical problems such as hypertension, diabetes, etc. many of these patients are referred to our mental wellness clinic by the doctors as a big part of their holistic treatment. management. Services are valued by the agency (OCRM).

Theoretical Orientation
Post-structural, post-modern, and narrative approaches.
