*Because there are University eligibility requirements, this is not a change-of-major option.*

The Bachelor of Science in Nursing is designed to provide students with knowledge, skills, and attitudes necessary for the performance of the professional nursing role and characteristics of the generally educated person. The program prepares a student to be a nursing generalist who can provide care within a framework of scientific and professional accountability, and can function independently in a variety of health settings. The Nursing program provides students with the necessary foundation for graduate education and specialization and promotes and fosters commitment to lifelong learning for personal and professional growth.
