Seeking Parents of Preschool-aged Children

Your participation in a research study could be worth $50.

We are conducting research examining how parents interact with their child about physical activity. We are interested in how daily changes in mood, your child’s behavior and expectations impact your interactions with your child.

We are seeking parents of preschool aged children (2-6 years) to volunteer to participate in this study along with their child.

Participation would involve meeting once with researchers for about one hour. For the 10 days following that meeting, you would be asked to complete a brief diary (<5 min/day) and you and your child wear a small device on your hip to assess physical activity.

To thank you for your participation, families will receive $40 plus an additional $10 if you complete the diary on all 10 days for a total of $50.

If you would like more information or to participate, please contact Dr. Kathleen Wilson at kswilson@fullerton.edu or 657-278-8329.
